# Transcending Patriots' Day(s)

Rationality and rationalising can be diametric. Borderless world seems like a pipedream nevertheless 'indeed a perceivable possibility' with miles to march toward but atleast better quicker than never or too later. This vicelike grip of territorial imperative and affixed greedy sinister motives of human has cause more than enough bloodshed in our history? Shall we continue? As a matter of fact, we go on continuing even today in various changing styles. When will these piling-up of arms and weapons, pompousness and gallantness of armed-forces the world over, their show of strength, victories and defeat become non-extant? Weapons of mass destruction exist, if instances and accidents trigger them, who will be the winner? Of course, no winner and whole species to extinction, perhaps forever and ever. Every elite, political leaders and many know thisgrave possible and probable nonextant consequence of entire species and the planet very well. But queerly, these are questions and initiatives that are repulsive to politicians thus remainedrich-concepts yet unwilling to practise or implement by sorting viable and co-operative means. nevertheless which have exuberant existential answer in itself if implemented!

The Implementation? crux!Convergence of collective responsibilities cutting across countries through far-sighted, benevolent and rational nature of individuals and leaders with paradigm shift towards a higher consciousness or evolving further from present scenario and real sense of civilisation will do. Open-mindedness. awareness coveringnook and corner and realisation of voluntary law abiding matters. With so many hungry mouths, deprivations, ever-increasing population, extreme zealotry, monopolies and if teeming vested interests go on thriving, it will never work.Even so-called work.Even so-called philanthropies, with sinister designs are functioning today. No doubt, philanthropy motives and potentials are abundant, but meagre real philanthropists.Inauspiciously, for most benevolent and healthy initiatives; marring doppelgangers too sprouted To stand up against all these is what I called the new patriot and bravery. Understanding ways and tackling climate and environment too isbravery plus altruism. They are patriots for whole humanity and world, the only planet we altogether inhabit. That's

where transcendence of Patriots' day, expanding and

embracing whole humanity and beyond boundaries of any

group irrespective of ethnic.

regional, state, country, continent or civilisation has

the potential to metamorphoseour earth to

heaven that exist only in fantasies or very unlikely after-

death. Irrefutably, it can't be

invoke through supernatural or occult means. Earth or universe

as motherland or fatherland, preserving ecology and collaboratively devising and

making sustainable plans effective implementation in the

long run defending undesired violence, rights to universal

citizenship in context to their essential links and evolving characteristics is earthly patriotism, which will be so beautiful and progressing.

Sports and competition need not be played only for national

or state or regional interest.

Certainly it will have ways to evolve and devised amicable

and interesting ways. And so-

called securities or armies need

not lost jobs but utilize in

calamities and disaster

management or emergent exigencies. Of course many conscientious objectors is bound to arise increasingly Then, when copious numbers of defence-forces become redundant and useless, its large part of investment can be streamline for betterment of humanity, ecology, environment and holistic development devising flexible rational and judicious plans. By all available parameters at present, its seems like an utopia and too fast forward but should human relationships and its environment should let changeand contribute ourselves for worse or better pokes us consciously if not unconsciously. Unless unconsciously. Unless we(people and mainly govt. and leaders around the world) commit and act with farsightedness, we as human beings will remain juvenile, less evolved and yield to maladjustments from time to time. With scientific advancement, magical-like scrutiny and plans for over-all betterment can be devised instead of investing on where and whom to spy, how to advance sophisticated weapons or production for lucrative business, what to exploit, how to satiate power-hunger and be Machiavellian, so and so! Randomly and so and so! Randomly and accidentally, we seem to survive inspite of so many weapons of mass destruction surrounding us and many sinister persons given responsibility in high pedestals all these years. There is quest in us that repels the idea of us being terminated along-with/ defeated by problems and

questions that arises but the affinity to solve and find answers haunts us much This piece of writing broaches and points to some or may appear to be reeked ofself-contradicting attributes. Even life itself is marked by contrasting(strongly appears) extremes of birth and death which in-between survive and truth, imaginations and circ umstantial tractions and circ umstantial practicalities. But what concerns here is aboutunhassled evolutionary course, complementary and supplementary perspectives instead of contrast and comparison that barriers and divides. When one look up at a clear night sky(deep dark background), one see celestial objects(bright) in their majestic beauty. Because of that contrast between the deep dark background and bright brilliant light, though distant we enjoy clearly the wonderful curiosity and wander ourimaginations. It's about realising, sometimes existential wholeness and embracing the contrast as complementariness towards inclusiveness and necessary corrections of concepts and ideas.It's about looking inside out and looking outside in too. how naive or adventurous one

may be. It's also about certain

concerns of melting each other cultures or defining identities as broil into soups but also opportune alternate perspectives, say retain like the attribute of Singju's components in their distinct uniqueness and symphonic flavour too. After-all, varieties enrich the garden called earth and who knows what scientific and on-going trends have to offer in future about our defining patterns.It is also realising about the highly probable actual magnitude of the macabre denouement of infinite problems likely to face soon how near or far so relative to the prevailing power dynamics. It's also about, one may not be powerful enough to initiate challenging campaigns and movements by circumstances, may not be able to script invent and discover stuffs that ameliorates over-all problem quickly,unluckily or agariouslyfail to walk the rope of ideal kind or conform to society that happened tenably, but still have the right to constructive criticism, suggestion, share opinions and reflections that suits and deem demanded in permutation and combination of ways as per differences of angles, perceptions and outlook even from a prison cell, from one about to be hanged or executed or from top of the pyramid or anybody dare to, through any medium if it makes sense, relevant or able to decode what it truly meant or points for. As usually said and agreed

it always starts a journey with a single step, oceans are made-upof innumerabledroplets, butterfly-effects and even placebo effects are existential phenomena in addition to wonder and mysteries of known unknowns and unknown unknowns. Sometimes it seems, seamlessness and sharp boundaries have its deepening plays in different dimensions sides of a same flipping coin Differences

variationsmeant to me richness of values and embracing existential realities including wild imaginations whosoever wonder and wander daringly or

It may be easy to talk, write dream or fantasise but the path to make it happened is often meandering with unexpected acquaintances along entailing painstaking efforts. By virtue of human tendency to be 'Happywithin-and-around' whatever it be, for success, development, relationships or endeavour anything; itself deduces the fact that no human or the humanity need no-more war and bloodshed whether incidentally or accidentally, to yield patriots or heroes of any form. Instead we need heroes or realise one's own unique heroicness for favourable holistic advancement as a whole. Fairly, as a matter of fact. strangely and very commonly, majority of the individual, people or govt. often freaks out when it comes to dealing with 'neighbour' be it in context to locality, state, country or region;sorry to mention the resiliency of that inextricable human-nature as of now. There dwells the baby steps and teething issues. Wish always, the ability to start walking and pushing limitations should not mounts to signature on water

#### Asian Games 2018-Day 6

## Heena Sidhu wins bronze. heartbreak for Manu

Experienced Indian shooter Heena Sidhu settled for a bronze medal in a topsy-turvy women's 10m air rifle final of the Asian Games in

Palembang on Friday. Heena shot a near-perfect 10.8 with just three shooters left in the field but a 9.6 in the next attempt dashed her hopes of a better finish at the Jakabaring

Shooting Range. Having made an incredible comeback after languishing at 13th and 17th places in the qualification stage, Heena did not look content with the eventual third-place finish as

she managed to reduce the gap to a mere 0.1 between her and the gold medal.

Heena shot 219.3 in the final. There was more disappointment in store for 16year-old Manu Bhaker as the Commonwealth Games gold-medallist was eliminated at fifth place with a score of 176.2. For two straight events at the ongoing Games, Bhaker shot brilliantly in the qualifications and cracked in the final. The Haryana girl had topped

the 25m pistol qualification with a Games record and was third on Friday.

#### Bopanna-Divij Sharan After Rowers' Medal Rush Top seeds Rohan Bopanna

and Divij Sharan notched up their maiden men's doubles gold medal at the Asian Games by beating Aleksander Bublik and Denis Yevseyev of Kazakhstan 6-3, 6-4 in 52 minutes. Less than 20 minutes into the match, the Indians were 4-1 ahead, breaking Bublik and Yevseyev at the very first opportunity they got In no time, the top seeds were serving for the set with a 5-3 lead and Bopanna's booming serve wrapped it up in style for them. In shooting, Heena Sindhu took home the bronze in women's 10m Air Pistol final after Manu Bhaker was eliminated. Earlier, India started their Asian Games 2018 Day 6 campaign with a bang by winning a gold and two bronze medals in rowing. The day started with Dushyant winning bronze in men's Lightweight Single Sculls This was followed by another bronze with Rohit Kumar and Bhagwan Singh finishing third in men's Lightweight Double Sculls. Following that, the the Indian team of of Sawarn Singh/Dattu Sawarn Sii Bhokanal/Om Prakash Sukhmeet Singh won gold in men's Quadruple Sculls to add to India's gold medal tally. Rowers joined India's medal party on Day 6 of the Asian Games 2018 by adding a gold and two bronze medals to the country's medal tally. The day started with Dushyant winning bronze in men's Lightweight Single Sculls, which was followed by another bronze with Rohit Kumar and Bhagwan Singh finishing third in men's Lightweight Double Sculls However, the icing on the cake

came in the next rowing event with the four-man Indian team of Sawarn Singh/Dattu Bhokanal/Om Prakash/ Sukhmeet Singh winning gold, India's fifth of the Games, in men's Quadruple Sculls.

After the three medals added by the rowers, India now have a total of 21 medals (5 gold, 4 silver and 12 bronze)

It all began with Dushyant, who had won Heat 1 in the qualification stage. He carried forward that form in the final, bettering his qualification time by quite some distance. Dushyant, who had clocked 7:43.08 in Heats but brought his Agame in the final, clocking a time of 7:18:76 to finish behind gold medallist Korea's Hyunsi Park (7:12:86) and silver medallist Hin Chun Chiu

(7:14.16) of Hong Kong. Next up was the men's Lightweight Double Sculls event Indian duo of Robit Kumar and Bhagwan Singh had qualified for the final through the Repechage after finishing second in their Heat. In the Repechage round, the Indian pair clocked the best time of 7:14.23 to top the charts and march into the final. In the final, the Japanese and

Korean teams proved too strong, leaving India to fight out for the bronze against Games host Indonesia. Rohit and Bhagwan easily beat the Indonesian challenge, finishing nearly 3 seconds ahead of them with a time of 7:04.61 to clinch the bronze. The highlight for Indian rowing came in the men's Quadruple event with Sawarn Singh/Dattu Bhokanal/Om Prakash/ Sukhmeet Singh doing the country proud

The awesome-foursome had topped the charts and clocked the best time in the two heats combined (6:15.18). In the final, the four Indian rowers once again produced a sterling effort to clock a time of 6:17.13 to finish well ahead of silver medallist Indonesia (6:20.58) and bronze winners Thailand

#### Asian Games 2018 Medal Tally

| S1<br>No. | Country        | Gold | Silver | Bronze Total |     |
