

'I challenge open debate with not less than an MLA of the BJP'

— Joykishan

IT News
Imphal, Dec 2,

Congress MLA Khumukcham Joykishan hits hard on rival ruling BJP government saying that all he did is the role that an opposition should do in democracy and challenge the ruling BJP for an open debate with anybody from the party but not less than an MLA.

"I challenge the ruling BJP for an open debate but with not less than an MLA", Joykishan said while talking to media persons today afternoon at Khuyathong. The Congress MLA who is also the spokespersons of the MPCC said that he will keep continue to pin point the wrongs that the ruling government is committing.

He added that if the government felt that there is no BJP MLA who can debate with him they can hire any BJP MLA from anywhere in the

country.

"If they feel the voice of the opposition is right than correct it instead of playing foul game", Joykishan said reacting to the statement of a BJP spokesperson regarding his criticism to the arrest and detention of TV Journalist Wangkhemcha Kishorchand. The MPCC spokesperson mock the BJP government saying that they don't seem understanding the constitution of India. The present Manipur government led by the BJP itself is unconstitutional as they appointed a Congress MLA who had defected and joined the BJP as Minister.

"It is violation of the constitution of India and BJP should know that", He said. Coming to the detention of Kishorchand, Joykishan said that it is again unconstitutional to suppress any voice of dissent. How could anybody who speaks against the government be arrested and that too under NSA that was supposed to use to armed rebel group, Joykishan questioned the government and added is the government planning NSA to anybody who speaks against the government.

Kishorchand is a Meitei Nationalist and his love for his Manipur provoked him to criticize the government, the MLA said while disclosing Kishorchand wife's statement

to him.

He further added that everybody knows what Kishorchand had did and most people particularly those in the judiciary knows whether it is right or wrong to detain Kishorchand for his critical comment which was posted at facebook.

"I respect Rani of Jhanshi but does this government know that there are also queen which were not less than the courage of Jhanshi Rani who had fought the enemy and sacrifice to protect the erstwhile kingdom", he said.

It is nationalist spirit of Kishorchand that he criticized the celebration of Jhanshi Rani as the queen had nothing to do with the state which was merged to the Indian Union only in 1949.

"Well, today we are part of India and we respect Rani of Jhanshi but why the government could not remembered Leima Linthoingambi or Chinglensana or other martyred King of the state who had sacrificed for protection of their motherland. Why the government failed to remember Khuleibam Khela, a Pangal soldier who had sacrifice assisting Paona Brajabasi fighting the British soldier during Khongjom War, Joykishan said.

Woman from Tripura raped by man she asked for help in Nagpur railway station

Agency

Agartala, Dec 2, The Times of India has reported that a 30-year-old woman from Tripura was raped by an unidentified man, whom she had asked for help to find a police station, in the shrubs near Nagpur railway station. Ganeshpeth police have registered a case of rape. The survivor was travelling from Coimbatore to Tripura in a train with her friend. The survivor had joined a company four months ago in Coimbatore. She resigned recently and was travelling back to her home. When the train stopped at Nagpur railway station, her friend was nowhere to be found.

To find her friend, the survivor got down from the train and

started looking for her. However, the train left the station and she was stranded in Nagpur.

The survivor then decided to approach the police to get her safely to Tripura. She asked a man at the station to help her. The accused took the survivor out of the railway station on the pretext of taking her to the police station, raped her at an isolated place, and fled.

The survivor somehow reached the main road where a Metro employee saw her and took her to the traffic department. Traffic cops soon alerted Ganeshpeth police who took the survivor under their care. Police are now scrutinizing CCTV footage of the spot.

One KYKL arrested

IT News
Imphal, Dec 2,

A team of CDO Moreh led by DSP/CDO Moreh Thomas Thokchom along with OC/CDO Moreh N. Jatishwar Singh, under the command of Addl SP Robinsun Khammam and supervision of SP/Tengnoupal Dr. S Ibomcha Singh arrested a cadre of banned organization KYKL from the area around Nongpok Panthoibi temple, Moreh at around 1030 am today. He revealed that he joined KYKL through one (L) Sanathoi who was also residing at Yumnam Huidrom at that time. He is currently based at Hanseng in Tamu(Myanmar).

CM launches 'Rabi Campaign 2018'

Such initiative would have positive impact on state's economy: CM

DIPR
Imphal, Dec 2,

With an objective to help the farmers to increase their productivity and achieve higher yield of various crops during Rabi season, the Chief Minister N. Biren Singh today launched the 'Rabi Campaign 2018' at Haotal Pangei, Imphal East.

Speaking as Chief Guest of the function, Chief Minister said that the launching of Rabi campaign would have positive impact on the economy of the State. He mentioned that he would personally monitor the updates and improvement of the initiative every week. He maintained that the government, private agencies and farmers need to work collectively so as to increase the production of agricultural and allied products. The government is planning to provide 100 percent subsidy to those deserving farmers on providing loans and procurement of machineries, he mentioned. A new policy for the welfare of the farmers would be announced soon, he added. Chief Minister stated that we need to discuss on why Manipur is still lagging behind in various sectors as compared to other States. The government is working

tirelessly to uplift the lives of the people and to bring positive changes in the State. It is the vision of the Prime Minister Narendra Modi to double farmers' income by 2022 in the country. Such initiative would definitely increase in the economy of the State, thus by making the farmers' as self reliant and self sustained, he continued. Highlighting the huge talents and potentials of the people in every sector, Chief Minister opined that if we work with transparency, honesty and sincerity, Manipur would become one of the best regions in the world. Chief Minister opined that the present government has already implemented various welfare schemes for the people of the State. Among the schemes, the Go to Village

is one such initiative to provide good governance at the grassroots.

Mentioning that around 36 percent of the population comprised BPL families, Chief Minister urged the government officials to work with transparency and sincerity so that these people would be benefited from various Government schemes. When we fulfil the aspirations and dreams of the people then the blessings of the people will shower upon us, he mentioned.

Clarifying on the recent attacks by unidentified animal in the State, Chief Minister appealed the people not to have an apprehension. He mentioned that the DFOs and Police Officials have been instructed to take preventive and precautionary measures for the

public safety. Wooden Cages have been set up to trap the unidentified animal at various places, he mentioned. He further stated that two forensic scientists from Dehradun will arrive today and would identify the animal soon.

Minister for Agriculture V. Hangkhanlian said that there are around 2.34 lakh hectares of cultivable land available in the State. However, large portion of land is being unused during off season, he added. He continued that we must find solutions for the optimal usage of such land. Minister further stated that the Agriculture department is working tirelessly to double the farmers' income by 2022. The Chief Minister also inspected the machineries which were put on exhibition for the farmers.

The launching function of Rabi Campaign and Agriculture Equipments Exhibition was organised jointly organised by Department of Agriculture and ManipurFarm Enterprise Private Limited.

Deputy Chairman of State Planning Board S. Rajen, MLA L. Susindro, Director Ph. Rajendro, officials of the Agriculture Department and farmers attended the programme.

Mysterious Animal Attack of Manipur State: A perspective

How to find the truth

By: Raghu Ningthoujam
Scientist Indian Space Research Organisation(ISRO)

As we all aware that there is a tense situation in the Manipur state at present about the attack by animal or group of animals on livestock and possible attacks on human beings, most vulnerable being kids, particularly at darkness(night time). Need of the hour is: How to understand it? What is the model to explain the attack? What are the preventive or/and precautionary measures to be taken up to curb or to stay safe from the scary event?

Is there really a mysterious Animal like Alien or is the attack carried out by existing normal animal species? The present situation can be fit into two models: (1) Migratory_model (2) Mystery or Alien_model

In #the_migratory_model, there is no involvement of any mysterious species, the modus operandi is executed by existing carnivorous animals like dogs, fox, keijelang(wild big cat), bear, leopard or tiger etc. There are two major contributing factors of the migratory model i.e. Disturbance in the ecosystem Deforestation, and change in season Temperature Drop. Disturbance always leads to wilderness.. rising in the entropy... Systems always are in search of minimum energy where they are stable. Deforestation- Disturbance of

the forest ecosystems of the wild animals by humans together with the unprecedented severe cold season of the winter in the state this year resulted in the one_night_migration of the wild animals in saving themselves from severe cold and in search of their foods on the way on and back to fill their stomach. Need of the hour is to keep ourselves alert waiting for the the recession of winter season and educate ourselves on disturbance of the ecosystems by way of the deforestation and animal hunting. The case history of being eaten only the intestinal parts of the victim domestic animals can be easily explained by this migratory model. Foods rich in fats and lipids like the #intestinal_organs help the attacking animals to keep themselves warm than the flesh. Also the footprints of the attacking animals in the case history of the attacks are of the existing animals. This is more like migration of the birds from Siberia to Loktak lake during winter. The fishes in the Loktak lake would be talking the same thing during winter that the are being attacked by mysterious species as we are taking about. Also, cold increases with altitude. That is hilly regions are colder than the valley region. Temperature

drops down first in the hills as the sun sets in the evening and temperature rises first in the morning as the sun rises. Also, this year's winters in manipur state has seen the maximum temperature drop than the earlier winter years. The extreme temperature drop can also cause behavioural changes of the animals even domestic ones. Thus, it is naturally favourable in this winter for the hilly wild animals to come down to the relatively warmer valley area to keep themselves warm in the night time where the teapaurae excursion is at peak and then go back to the hilly area again to the #favourable_temperature during day time and of course for their safety. On the onward and return journey, they need food to ease their hunger and to keep themselves warm. Attack can happen in various areas in short span which is also observed from the existing cases. Thus, migratory model of existing wild animals can explain most of the cases happening in this attack presently happening. However, this model cannot explain about emergency of the new species like aliens like Chupacabra. Thus, alien model comes into picture.

In the mystery or Alien_model, there is a mysterious Animal species like

Chupacabra and operation is being out by him or her. Existence of such animal is also reported in other regions of the world and there is a chance that it could have come from neighbouring country like Burma. The description as narrated by eyewitnesses who have seen the animal in darkness nearly matches to this animal. Also, reported events elsewhere also attract our mind to this kind of creature. Nevertheless, nobody tries to capture a photo of the creature specifically by those people particularly lilong event.

Thus, what prevention or precaution are required. Try to take a photo of the creature. CCTV footage will help to solve the problem. We must stay alert for our safety whatever it is. We can plan for an event and install the night_vision CCTV can capture the entire episode. Otherwise, wait for the recession of the cold winter season and onset of the warmer summer season will naturally diminish the problem. Build the forestry and natural ecosystem of wild animals and don't disturb their home. Whatever it is either a wild animal or mysterious animal, please #do_not_kill the creature rather try to capture using night_vision CCTV what_is_the_truth

Tobacco product seized

IT News
Imphal, Dec 2,

A police team seized huge quantity of tobacco products at Saivom area of Tengnoupal district while trying to smuggled it at Moreh in a Tata Magic Vehicle bearing registration MN06LA 3581 yesterday.
