## RPF President Irengbam Chaoren greets people on occasion of its army wing PLA's 40<sup>th</sup> Raising Day

IT News  
Imphal, Sept 24,

Proscribed group People's Liberation Army (PLA), the army wing of the Revolutionary Peoples' Front (RPF), is observing the 40<sup>th</sup> raising day on September. President of the rebel group Irengbam Chaoren greets the people of the state in connection with the raising day.

A statement issued to media houses by RPF's president irengbam Chaoren categorically stated the present state of the region. "Manipur today is besieged by myriad socio-political and economic issues and we will never be able address these issues effectively as long as we live under the Indian colonial rule" Chaoren stated. The statement further said that the collective wish of our

people to extricate Manipur out of the prevailing sorry state of affairs, India's repressive policies have devastated the society, and the puppet rulers who have been incapacitated to exercise any of their faculties for the welfare of the land will never be able to resolve the myriad issues and problems conclusively.

"All kinds of social issues have been multiplying today while communal harmony and sense of inter-community brotherhood have been poisoned but the puppet rulers are simply watching helplessly because all these negative developments are directly or indirectly linked to Indian colonial policies. This link can be traced to New Delhi's policies of suppression, division and weakening smaller communities by way of pitching one group of people

against another with the ulterior motive of annihilating all the smaller communities. This link was visible in all the relationships shared between colonial rulers and colonized peoples across the world and this link is still operating quite actively in Manipur and WESEA.

"It's time for our people to stop directing all our wrath and grievances against the helpless and puppet State rulers and re-direct our energy and take on Indian colonial rulers for they are the real culprits. If we continue to seek solutions to the myriad issues and problems through the puppet rulers, the issues and problems will only get complicated and the social unrest will escalate because the puppet rulers have accustomed to using all their energy and wisdom only for elections and they have been

baptized in the Indian brand of politics. It's time for all of us to revert to our traditional ethics 'action speaks louder than words' rather than only shouting without doing anything, a parasitic character which we imbibe from our association with Mayangs so that we can challenge the Indian colonial rule directly and their diabolic policies which are the root causes of all our problems and hardships. This can save us from blaming and tearing into each other, a social evil born out of the forced annexation of Manipur by India, and from ultimately sinking together. Seeming differences among us have been strengthening the Indian colonial rule and the colonial rulers have been taking advantage of this seeming disunity. So the foremost task is unification. We must unite to identify and

resolve each and every single problem entangling the society.

"For we are at present living under the Indian colonial rule, there is a growing need for all of us to walk together on a common path and create a commonness among our wishes with regard to certain national tasks which must be accomplished without fail. This will certainly help in removing distrust among us and tendency to oppose one another apart from reducing the adverse impacts caused by different problems and issues. Howsoever justified they are and though they are characteristics of Indian democracy, bands and blockades are becoming very unpopular in Manipur.

"This is a social change brought about by difficulties faced by masses over the years. Any agitation launched

after overlooking this change which causes undue misery to the masses in the name of demanding one's rights will prove suicidal and malignant. It is crucial to devise modes of agitation which have least impacts on daily wage earners, healthcare services and education with the exception of general strikes called on key national issues.

"Our people are anxious and apprehensive about possible threats to the integrity of Manipur vis-à-vis the peace talk going on between India and NSCN-IM. At the same time, our people must understand that GoI, while ignoring the collective wish and aspiration of Naga people, has been working to terminate the armed revolutionary movement of Naga people after coercing NSCN-IM to sign a deceitful agreement. GoI
