Prof. R. K. Uppal conferred upon the Punjab Rattan

The teacher saves us from this situation and saves the society by giving us the understanding and wisdom to take the right decisions. It would be ironic to say that in today’s era, the knowledge gained at school, colleges and universities towards the teachers who are the agents of social change has diminished. This is a dangerous trend. On the other hand, there are some instances of teachers in the field of education who have put their heart, soul and time into the teaching profession. He has indeed been a shining light and a source of inspiration for many teachers, including the present ones of the Punjab Education Department. It is needless to add that to the best guidance and inspiration of these leaders, we owe a lot because of their selfless dedication and hard work.

In such a situation, it is necessary that we give respect to the teachers and the government should not only provide the best education system but also take steps to improve their service conditions. In this context, teacher education and training are the key areas as they need to be given due importance in the current education system.

The teacher’s work is not only limited to the classroom but also extends to the society. They are the ones who shape the future of a nation and prepare the next generation for their role in society. With great respect and admiration, I wish to convey my heartfelt gratitude and appreciation for the invaluable services rendered by Prof. R. K. Uppal, who has always been a role model for all of us. His journey of dedication and excellence in the field of education will continue to inspire and motivate us to strive for excellence in our respective domains.

In conclusion, it is our collective responsibility to uphold and respect the sanctity of the profession of teaching, as it plays a crucial role in shaping the future of our society. Let us join hands to spread the message of respect and dignity towards our educators, who are the true custodians of knowledge and the torchbearers of tomorrow.
